CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

1.	BASIC SCIENCE.....	4
1.1.	BASIC SCIENCE OF HAIR	4
1.1.1.	Scalp Anatomy and Physiology.....	4
1.1.2.	Cyclic Activity of Hair	4
1.1.3.	Androgen-dependent Hair	4
1.1.4.	Pathophysiology of androgenic alopecia.....	4
1.1.5.	Alopecia: classification and incidence.....	4
1.1.6.	Types of Hair	4
1.1.7.	Racial and Individual Variations.....	4
1.1.8.	Hair Loss Etiologies	4
1.1.9.	Excess Hair Growth.....	6
1.1.10.	Dermatological Scalp Conditions.....	6
1.2.	EPIDEMIOLOGY AND DEMOGRAPHICS OF HAIR LOSS	8
1.2.1.	Age and AGA in men.....	8
1.2.2.	Female AGA.....	8
1.2.3.	Ethnic variation in the characteristics of skin, scalp, and hair	8
1.3.	WOUND HEALING	8
1.3.1.	Basic science.....	8
1.3.2.	Factors that influence wound healing.....	8
1.3.3.	Anatomic and skin type considerations.....	8
1.3.4.	Microbiology.....	8
1.3.5.	Biomechanics and histology of normal skin and scars	8
1.3.6.	Wound Healing	8
2.	CLINICAL SCIENCE	8
2.1.	GENERAL SURGICAL PRINCIPLES	8
2.1.1.	Sterile technique	8
2.1.2.	Instrumentation.....	9
2.1.3.	Instrument preparation	9
2.1.4.	Closure materials.....	9
2.1.5.	Wound care.....	9
2.2.	PATIENT CONSULTATION, EVALUATION, AND PREPARATION	9
2.2.1.	Psychology of Hair	9
2.2.2.	Patient evaluation	9
2.2.3.	Selection.....	10
2.2.4.	Standardized photography for hair restoration	10
2.2.5.	Medicolegal issues in hair replacement.....	10
2.2.6.	Hair Transplantation	10
2.2.7.	Hairline design details.....	12
2.2.8.	The Donor Site	13
2.2.9.	Graft Preparation Techniques	13
2.2.10.	Graft Insertion Techniques: Manual/Implanter Devices	13
2.2.11.	Postoperative Care	13
2.2.12.	Scalp Reductions and Scalp-Lifting	13
2.2.13.	Pedicle rotation flaps in the surgical treatment of alopecia	15
2.3.	DEVELOPMENT OF TREATMENT PLAN.....	16
2.3.1.	Patient expectations.....	16
2.3.2.	Surgical feasibility	16
2.3.3.	Assessments of risks/benefits of treatment plan	16
2.3.4.	Informed consent to include alternative therapies.....	16
2.4.	ANESTHESIA	16
2.4.1.	ASA risk classification	16
2.4.2.	Topical	16

International Society of Hair Restoration Surgery

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

2.4.3.	Local	16
2.4.4.	Regional.....	16
2.4.5.	Nerve block anesthesia of the scalp	16
2.4.6.	Special Considerations	16
2.4.7.	Complications	16
2.4.8.	Pain control and management of the postoperative period	16
2.5.	EMERGENCY PREPAREDNESS	16
2.5.1.	Management of surgical emergencies.....	16
2.5.2.	Basic and Advanced Cardiac Life Support (ACLS Curriculum).....	17
2.5.3.	Emergency situations in hair transplantation.....	17
2.6.	RECONSTRUCTION	19
2.6.1.	Surgical techniques.....	19
2.6.2.	Surgical options	19
2.7.	COMPLICATIONS	19
2.7.1.	General theory, management, and prevention of complications:	19
2.7.2.	Complications of Hair Transplantation.....	20
2.7.3.	Complications of Flaps in the Treatment of Baldness	20
2.7.4.	Scar revision	20
2.8.	STRATEGIES IN UPDATING OLD TECHNIQUES AND CORRECTING SUBOPTIMAL RESULTS	22
2.9.	INTERDISCIPLINARY CARE OF PATIENT.....	22
2.9.1.	Interdisciplinary care for complicated cases.....	22
2.9.2.	Interaction with other medical and surgical specialists to provide optimal care.....	22
2.9.3.	Education of other medical, surgical, and lay specialists in HRS	22
2.9.4.	Non-surgical Hair Replacement	22
2.10.	MEDICAL THERAPY	22
2.10.1.	Current understanding of AGA and testosterone.....	22
2.10.2.	Minoxidil.....	22
2.10.3.	Finasteride	22
2.10.4.	Dutasteride	22
2.10.5.	Low level light therapy.....	22
2.10.6.	Other treatments (PRP)	22
2.10.7.	OTC.....	22
2.11.	SPECIAL CONSIDERATIONS	22
2.11.1.	Hair Transplantation in Blacks.....	22
2.11.2.	Hair Transplantation in Asians.....	22
2.11.3.	Hair Transplantation in Females.....	22
2.11.4.	Hair transplantation of the eyebrows	22
2.11.5.	Hair transplantation of the eyelashes	22
2.11.6.	Reconstruction of the Temporal Points Area.....	22
2.11.7.	Moustache Transplantation	22
2.11.8.	Hair Transplantation in Skin Grafts, Thin Recipient Skin, and Radiation induced Alopecia.....	22
2.11.9.	Treatment of the genetically male transsexual.....	22
2.11.10.	The treatment of female pattern alopecia	23
2.11.11.	Synthetic hair	23
2.11.12.	Automation techniques in HRS	23
2.11.13.	Scalp Reconstruction Techniques	23
2.11.14.	Ethics, Marketing & Patient consent.....	23
3.	PROFESSIONAL/REGULATORY TOPICS	23
3.1.	MEDICAL-LEGAL ISSUES	23
3.1.1.	Risk assessment in the surgical patient.....	23
3.1.2.	Medical record documentation.....	23
3.1.3.	Quality assurance (QA) and continuous quality improvement (CQI).....	24

International Society of Hair Restoration Surgery

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

3.1.4.	<i>Informed consent.....</i>	<i>24</i>
3.1.5.	<i>Photographic Reproduction.....</i>	<i>25</i>
3.2.	REGULATORY ISSUES.....	25
3.2.1.	<i>U.S. Occupational Safety and Health Administration (OSHA) standards.....</i>	<i>25</i>
3.2.2.	<i>Blood borne pathogens (BBP).....</i>	<i>25</i>
3.3.	PROFESSIONAL ETHICS.....	26
3.3.1.	<i>Professional ethical standards.....</i>	<i>26</i>
3.3.2.	<i>Selection of the most cost-effective treatment plan given patient goals.....</i>	<i>26</i>
3.3.3.	<i>Realistic expectations.....</i>	<i>26</i>
3.3.4.	<i>Professional Marketing.....</i>	<i>26</i>

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

1. Basic Science

1.1. Basic Science of Hair

1.1.1. Scalp Anatomy and Physiology

1.1.1.1. Classic anatomy with emphasis on the scalp and hair

1.1.1.2. Topographical features and underlying bony cranium, musculature and neurovascular anatomy

1.1.1.3. Blood supply of the head and neck

1.1.1.4. Sensory innervation of the head and neck

1.1.1.5. Motor innervation of the head and neck

1.1.1.6. Lymphatic drainage of the head and neck

1.1.1.7. Relaxed skin tension lines of the head and neck

1.1.1.8. Histology/Microscopic anatomy of the skin, scalp, subcutaneous tissues, with specific emphasis on the hair follicle

1.1.1.9. Physiology of the skin and soft tissues

1.1.2. Cyclic Activity of Hair

1.1.3. Androgen-dependent Hair

1.1.4. Pathophysiology of androgenic alopecia

1.1.5. Alopecia: classification and incidence

1.1.5.1. Male

1.1.5.2. Female

1.1.5.3. Age and Degree of Male Pattern Baldness

1.1.6. Types of Hair

1.1.7. Racial and Individual Variations

1.1.8. Hair Loss Etiologies

1.1.8.1. Androgenetic Alopecia and Its Treatment

1.1.8.1.1. Overview

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 1.1.8.1.1.1. Male vs. Female
- 1.1.8.1.2. History
- 1.1.8.1.3. Biochemistry and Pathogenesis
- 1.1.8.1.4. Medical Treatment of Androgenetic Alopecia
- 1.1.8.1.5. Hair Examination and Investigation
 - 1.1.8.1.5.1. Length of the Hair Cycle – Examination of Hair Roots
 - 1.1.8.1.5.2. Hair Shaft Length and Diameter Measurements
 - 1.1.8.1.5.3. Hair Shaft Morphology – Vellus Hair Index
 - 1.1.8.1.5.4. Hair and Hair Follicle Microscopy
- 1.1.8.2. Cicatricial Alopecias
 - 1.1.8.2.1. Morphea
 - 1.1.8.2.2. LPP
 - 1.1.8.2.3. Scleroderma
- 1.1.8.3. Alopecia Areata
 - 1.1.8.3.1. Etiology
 - 1.1.8.3.2. Diffuse pattern Alopecia Areata
 - 1.1.8.3.3. Dermatopathology
 - 1.1.8.3.4. Clinical Features
 - 1.1.8.3.5. Progression
 - 1.1.8.3.6. Associated Clinical Changes
 - 1.1.8.3.7. Treatment
 - 1.1.8.3.8. Prognosis

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 1.1.8.4. Congenital Alopecia
- 1.1.8.5. Circumscribed Alopecia
- 1.1.8.6. Total Alopecia
- 1.1.8.7. Hypotrichosis
- 1.1.8.8. Abnormalities of Hair Shaft
- 1.1.8.9. Traumatic Alopecia
- 1.1.8.10. Disturbances of Hair Cycle: Telogen Effluvium
- 1.1.8.11. Diffuse Alopecia of Endocrine Origin
- 1.1.8.12. Alopecia of Chemical Origin
- 1.1.8.13. Alopecia of nutritional and metabolic Origin
- 1.1.8.14. Chronic Diffuse Alopecia
- 1.1.8.15. Alopecia in Central Nervous System Disorders
- 1.1.9. Excess Hair Growth
 - 1.1.9.1. Hypertrichosis
 - 1.1.9.2. Hirsutism
- 1.1.10. Dermatological Scalp Conditions
 - 1.1.10.1. Pityriasis Capitis
 - 1.1.10.2. Pityriasis Amiantacea
 - 1.1.10.3. Seborrhea
 - 1.1.10.4. Seborrheic Dermatitis
 - 1.1.10.5. Seborrheic Dermatitis of Infancy
 - 1.1.10.6. Psoriasis of the Scalp
 - 1.1.10.7. Tinea Capitis
 - 1.1.10.8. Pruritic Syndromes
 - 1.1.10.9. Lichenification and lichen Simplex
 - 1.1.10.10. Contact Dermatitis
 - 1.1.10.11. Acne Necrotica
 - 1.1.10.12. Follicular Keloidalis Nuchae (Acne Cheloidalis)

International Society of Hair Restoration Surgery

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

1.1.10.13 Folliculitis Decalvans

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 1.2. Epidemiology and Demographics of hair loss
 - 1.2.1. Age and AGA in men
 - 1.2.2. Female AGA
 - 1.2.3. Ethnic variation in the characteristics of skin, scalp, and hair
- 1.3. Wound Healing
 - 1.3.1. Basic science
 - 1.3.1.1. Phases of wound healing
 - 1.3.1.2. Tensile strength
 - 1.3.1.3. Theories of epidermal and dermal wound healing
 - 1.3.2. Factors that influence wound healing
 - 1.3.2.1. Environmental
 - 1.3.2.2. Local
 - 1.3.2.3. Systemic
 - 1.3.2.4. Genetic
 - 1.3.3. Anatomic and skin type considerations
 - 1.3.4. Microbiology
 - 1.3.4.1. Normal skin flora
 - 1.3.4.2. Pathogenic organisms
 - 1.3.5. Biomechanics and histology of normal skin and scars
 - 1.3.6. Wound Healing
 - 1.3.6.1. Wound healing in hair restoration surgery
 - 1.3.6.2. Postoperative dressings

2. Clinical Science

- 2.1. General Surgical Principles
 - 2.1.1. Sterile technique
 - 2.1.1.1. Surgical site preparation
 - 2.1.1.1.1. Choice of antiseptic solution

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.1.1.1.2. Skin prep technique
- 2.1.1.2. Staff preparation
 - 2.1.1.2.1. Hand washing/surgical scrubbing
 - 2.1.1.2.2. Gowning and gloving
- 2.1.1.3. Surgical site draping
- 2.1.2. Instrumentation
- 2.1.3. Instrument preparation
 - 2.1.3.1. Instrument handling and sterility
 - 2.1.3.2. Theory of sterilization
 - 2.1.3.3. Methods of sterilization
 - 2.1.3.4. Resources necessary for sterilization
- 2.1.4. Closure materials
- 2.1.5. Wound care
- 2.2. Patient Consultation, Evaluation, and Preparation
 - 2.2.1. Psychology of Hair
 - 2.2.1.1. Body Image
 - 2.2.1.2. Self Esteem
 - 2.2.1.3. Beards
 - 2.2.1.4. Moustaches
 - 2.2.1.5. Eyebrows
 - 2.2.1.6. Eyelashes
 - 2.2.2. Patient evaluation
 - 2.2.2.1. Appropriate surgical preoperative physical examination
 - 2.2.2.2. Allergies
 - 2.2.2.3. Medications
 - 2.2.2.3.1. Anticoagulants
 - 2.2.2.3.2. Drug interactions

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.2.2.4. Past medical history/Review of systems
 - 2.2.2.4.1. Diabetes
 - 2.2.2.4.2. Heart disease
 - 2.2.2.4.3. Bleeding disorders
 - 2.2.2.4.4. Immunosuppression
- 2.2.2.5. Need for antibiotic prophylaxis
- 2.2.2.6. Alcohol and tobacco use
- 2.2.2.7. Social history
- 2.2.2.8. Hair loss etiologies
 - 2.2.2.8.1. Anatomic considerations
 - 2.2.2.8.2. Appropriate diagnostic studies
- 2.2.3. Selection
 - 2.2.3.1. Realistic expectations
 - 2.2.3.2. Motivation for HRS
 - 2.2.3.3. Classification and treatment options
 - 2.2.3.4. Hair characteristics
 - 2.2.3.5. Special considerations in the younger patient
 - 2.2.3.6. Risk Benefit ratios
 - 2.2.3.6.1. General
 - 2.2.3.6.2. Patient Specific
- 2.2.4. Standardized photography for hair restoration
- 2.2.5. Medicolegal issues in hair replacement
 - 2.2.5.1. Physician Responsibilities
 - 2.2.5.2. Patient education
 - 2.2.5.3. The Process of informed consent
- 2.2.6. Hair Transplantation
 - 2.2.6.1. History
 - 2.2.6.1.1. Hair transplant

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.2.6.1.2. Scalp reduction
- 2.2.6.1.3. Scalp flaps
- 2.2.6.1.4. Scalp expanders
- 2.2.6.1.5. Scalp extenders
- 2.2.6.2. Instrumentation
- 2.2.6.3. Operating Room Setup
- 2.2.6.4. Staffing
- 2.2.6.5. Donor site evaluation
- 2.2.6.6. Terminology of graft sizes
 - 2.2.6.6.1. Round punch graft
 - 2.2.6.6.2. Mini graft
 - 2.2.6.6.3. Micro-graft
 - 2.2.6.6.4. Single hair graft
 - 2.2.6.6.5. Follicular unit graft
 - 2.2.6.6.6. Multi-follicular unit graft
 - 2.2.6.6.6.1. FUs
 - 2.2.6.6.6.2. Non FUs
- 2.2.6.7. Graft Dissection techniques
 - 2.2.6.7.1. Punch grafting
 - 2.2.6.7.2. Single ellipse
 - 2.2.6.7.2.1. Microscope
 - 2.2.6.7.2.2. Loupes
 - 2.2.6.7.2.3. Slivering
 - 2.2.6.7.3. Multibladed knife
 - 2.2.6.7.4. Follicular unit extraction
- 2.2.6.8. Hairline design
- 2.2.6.9. Recipient site considerations
 - 2.2.6.9.1. Angle of incision

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.2.6.9.2. Orientation of incision
- 2.2.6.10. Graft placement
- 2.2.6.11. Postoperative Care
- 2.2.6.12. Complications
- 2.2.6.13. Repairs
- 2.2.7. Hairline design details
 - 2.2.7.1. Density gradient
 - 2.2.7.2. Principles of hairline placement
 - 2.2.7.2.1. Facial Balance & structural
 - 2.2.7.2.2. Ethnic considerations
 - 2.2.7.2.3. Gender considerations
 - 2.2.7.2.4. Realistic expectations

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.2.7.3. Planning for future hair loss
- 2.2.8. The Donor Site
 - 2.2.8.1. Evaluation
 - 2.2.8.2. Density
 - 2.2.8.3. Tissue Turgidity
 - 2.2.8.4. Scar Management
 - 2.2.8.5. Donor Closure
 - 2.2.8.6. Trichophytic donor closure
 - 2.2.8.7. Accurate estimation of graft requirements when using multibladed knives
 - 2.2.8.8. Elliptical donor harvesting
 - 2.2.8.9. Graft survival
- 2.2.9. Graft Preparation Techniques
 - 2.2.9.1. Graft classification (Micro, mini, FU)
 - 2.2.9.2. Ellipse harvest
 - 2.2.9.3. Multibladed knife
 - 2.2.9.4. Punch grafts
 - 2.2.9.5. Impulse force
 - 2.2.9.6. Use of microscopes
 - 2.2.9.7. Cooling Grafts
 - 2.2.9.8. Storage Solutions
- 2.2.10. Graft Insertion Techniques: Manual/Implanter Devices
 - 2.2.10.1. Parallel Slits
 - 2.2.10.2. Perpendicular slits
 - 2.2.10.3. Manual insertion techniques
 - 2.2.10.4. Implanter devices
- 2.2.11. Postoperative Care
- 2.2.12. Scalp Reductions and Scalp-Lifting

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.2.12.1. Basic Principals of Flap Anatomy and Physiology
 - 2.2.12.1.1. Axial vs. Random Flaps
 - 2.2.12.1.2. Delays
 - 2.2.12.1.3. Advancement vs. Pedicle Flaps
 - 2.2.12.1.4. Suturing limitations
 - 2.2.12.1.5. Tip management
- 2.2.12.2. Planning and Dynamics
- 2.2.12.3. Anesthesia
- 2.2.12.4. Scalp Reductions
 - 2.2.12.4.1. Multiple patterns of scalp reductions
 - 2.2.12.4.2. Scalp extenders to facilitate reduction procedures
 - 2.2.12.4.3. Slot formation, prevention and management
 - 2.2.12.4.4. Slot Correction by a Three-Hair-Bearing Flaps Transposition Procedure in Combination with Scalp Reduction
- 2.2.12.5. Intraoperative tissue expansion
 - 2.2.12.5.1. Tension clamps
 - 2.2.12.5.2. PATE (prolonged acute tissue expansion)
- 2.2.12.6. Scalp Lifting for Major Reductions
- 2.2.12.7. Tissue Expansion biological considerations
 - 2.2.12.7.1. Biological Creep in Tissue Expansion
 - 2.2.12.7.2. Mechanical Creep in Tissue Expansion
 - 2.2.12.7.3. Expanded Scalp Flap Techniques

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.2.12.8. Rotation Scalp Flaps
- 2.2.12.9. Managing Complications of Scalp Reductions and Scalp Lifts
- 2.2.13. Pedicle rotation flaps in the surgical treatment of alopecia
 - 2.2.13.1. Temporoparieto-Occipital Flaps
 - 2.2.13.2. Flap delay
 - 2.2.13.2.1. Physiology
 - 2.2.13.2.2. Technique

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.3. Development of treatment plan
 - 2.3.1. Patient expectations
 - 2.3.2. Surgical feasibility
 - 2.3.2.1. Extent of baldness
 - 2.3.2.2. Donor tissue available
 - 2.3.2.3. Scalp reduction, lift, expansion, extension
 - 2.3.3. Assessments of risks/benefits of treatment plan
 - 2.3.4. Informed consent to include alternative therapies
- 2.4. Anesthesia
 - 2.4.1. ASA risk classification
 - 2.4.2. Topical
 - 2.4.3. Local
 - 2.4.4. Regional
 - 2.4.5. Nerve block anesthesia of the scalp
 - 2.4.6. Special Considerations
 - 2.4.6.1. Monitoring
 - 2.4.6.2. Preoperative anxiolytics
 - 2.4.6.3. Conscious sedation
 - 2.4.6.4. General anesthesia
 - 2.4.7. Complications
 - 2.4.8. Pain control and management of the postoperative period
- 2.5. Emergency Preparedness
 - 2.5.1. Management of surgical emergencies
 - 2.5.1.1. Office emergency equipment
 - 2.5.1.2. Staff/physician preparedness
 - 2.5.1.3. Management of office and surgical emergencies including but not limited to:
 - 2.5.1.3.1. Syncope

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.5.1.3.2. Convulsions
- 2.5.1.3.3. Hemorrhage
- 2.5.1.3.4. Anesthetic toxicity
- 2.5.1.3.5. Allergic reactions
- 2.5.1.3.6. Anaphylaxis
- 2.5.1.3.7. Myocardial infarction
- 2.5.1.3.8. Acute Hypertension
- 2.5.1.3.9. Thromboembolism
- 2.5.1.3.10. Cardiac arrest
- 2.5.2. Basic and Advanced Cardiac Life Support (ACLS Curriculum)
- 2.5.3. Emergency situations in hair transplantation
 - 2.5.3.1. ACLS
 - 2.5.3.2. Drug toxicity
 - 2.5.3.3. Drug Interactions
 - 2.5.3.3.1. Non Selective Beta Blocker
 - 2.5.3.3.2. Viagra
 - 2.5.3.4. Anaphylaxis
 - 2.5.3.4.1. Distributive Hypovolemia
 - 2.5.3.4.2. Treatment
 - 2.5.3.4.2.1. Volume expansion
 - 2.5.3.4.2.2. Steroids
 - 2.5.3.4.2.3. Antihistamines
 - 2.5.3.4.2.4. Support
 - 2.5.3.5. Drug overdose
 - 2.5.3.6. Monitoring
 - 2.5.3.7. Resuscitation equipment
 - 2.5.3.7.1. AED

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

2.5.3.7.2. Airway management

2.5.3.7.2.1. LMA's

2.5.3.7.2.2. Oral airway

2.5.3.7.2.3. Endotracheal intubation

2.5.3.7.3. IV Access techniques

2.5.3.8. Bleeding complications

2.5.3.8.1. Von Willebrand's disease

2.5.3.8.2. Aspirin

2.5.3.8.3. Coumadin

2.5.3.8.4. Clopidogrel

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

2.6. Reconstruction

2.6.1. Surgical techniques

2.6.1.1. A traumatic tissue handling

2.6.1.2. Hemostasis

2.6.1.3. Suture technique

2.6.1.4. Dressing

2.6.1.5. Wound management

2.6.2. Surgical options

2.6.2.1. Hair transplant

2.6.2.2. Scalp reduction

2.6.2.3. Scalp flaps

2.6.2.4. Scalp extension

2.6.2.5. Scalp lifting

2.6.2.6. Second intention healing

2.6.2.7. Split thickness skin grafts

2.6.2.8. Full thickness skin grafts

2.6.2.9. Artificial skin and allograft, xenograft

2.7. Complications

2.7.1. General theory, management, and prevention of complications:

2.7.1.1. Tissue necrosis

2.7.1.2. Bleeding, hematoma

2.7.1.3. Infection

2.7.1.4. Wound dehiscence

2.7.1.5. Postoperative patient education regarding possible complications, wound care, activity level and need for surgical revision

2.7.1.6. Management of chronic or non-healing wounds

2.7.1.7. Deep Vein Thrombosis

CORE CURRICULUM IN HAIR RESTORATION SURGERY

Revised October 5, 2017

- 2.7.2. Complications of Hair Transplantation
 - 2.7.2.1. Scarring and keloid formation
 - 2.7.2.2. Inadequate growth
